Biography

Professor Bulent İÇGEN received his MSc. and PhD. in Biotechnology at Middle East Technical University (METU) of Ankara in 1994 and 2000, respectively. He conducted two-year-post-doctoral research at the Department of Chemical Engineering, Bioprocess Engineering Research Unit of University of Cape Town (UCT) in South Africa. He has been a faculty at METU in the Department of Environmental Engineering since 2012. Meanwhile, as a visiting faculty, he visited Princeton University (PU) Department of Civil and Environmental Engineering and Massachusetts Institute of Technology (MIT) Department of Earth, Atmospheric and Planetary Sciences (EAPS) in 2011 and 2015, respectively. His interests lie in the fascinating and often complex array of processes taking place in microbial environment and the behaviour of the microorganisms under different environmental conditions. He particularly enjoys looking at systems from environmental and microbial biotechnology perspective, trying to tease out the key relationships between consortiums. He likes using molecular biological methods to investigate the occurrence and distribution of bacteria in the environment in order to provide direct information on community structure for variety of environmental and industrial applications. His team focuses on microbial biotechnology, biogas plants, digestate treatment and biomass-to-energy plants.
